

EDUCATION

PhD Computer Science*University of Washington, advised by Yejin Choi*Apr 2027
Seattle, WA**MS Computer Science; 4.00***Brigham Young University, advised by David Wingate*Aug 2022
Provo, UT

Incomplete - left to pursue PhD

- GRE, 169 / 170 Quantitative (96th percentile), 165 / 170 Verbal (96th percentile)

BS Applied and Computational Mathematics; 3.89*Brigham Young University*Apr 2021
Provo, UT

- ACT, 36 / 36 (99.8th percentile)

EXPERIENCE

Xlab - Research Assistant

Sep 2022 - Present

- Researching large language models, common sense reasoning, morality and AI, and NLP for social good

Perception, Control, and Cognition Laboratory - Research Assistant

Apr 2020 - Sep 2022

- Demonstrated the effectiveness of mutual information as a prompt selection criterion on 8 datasets and 7 models (first author, ACL)
- Engineered psychology-backed automatic rephrasing technique with GPT-3 to aid productivity of online conversations in collaboration with social scientists at Duke and BYU (in human trials)
- Developed and validated effective prompt compression technique up to 100x for large language models (in review, EMNLP)
- Controlled difficult soft robot in real-time by combining first-principles physics and deep learning (Frontiers in Robotics and AI)
- Contributed to open-source NLP data augmentation library (paper)

Enveda Biosciences - Data Science Intern

Aug 2022 - Sep 2022

- Improved mass spectrometry to chemical structure machine translation model's validation performance by 5% using backtranslation (currently being worked into a paper and deployment)

Double River Investments - Machine Learning Engineer

Jun 2020 - Aug 2021

- Informed live-traded quantitative investment model with transformer-based neural network, combining recent work by implementing and validating 5 research papers
- Deployed production pipeline so model could be used in real time by multi-million dollar hedge fund

Gray Falcon - Deep Learning Consultant

Dec 2019 - Apr 2020

- Sold NLP class project to company for \$10k by solving a crucial business need, saving thousands of man-hours monthly

Math Department, BYU - Competitive Coding Instructor

Jan 2020 - Apr 2020

- Taught 18 students three times a week by developing coursework from scratch
- Helped place several students at top jobs and internships by refining their coding interview skills

Computer Vision - Research Assistant

Feb 2019 - Dec 2019

- Awarded top prize in student research conference for work in pose correspondence
- Developed human-led, AI-assisted video annotation website to be used by MTurk workers

SKILLS

Python, PyTorch, Huggingface, Numpy, Pandas, SQL, Unix/Bash, Git, LaTeX, Docker

Some proficiency in Tensorflow, Julia, Java, C++, data scraping, and web development

RELEVANT PROJECTS

Solve Reinforcement Learning Environments: Used several DL/ML techniques to solve complex control environments from OpenAI's gym, including implementing Proximal Policy Optimization (PPO) from scratch

Deepfake Detector Facebook Competition: Implemented 3D-CNN and CNN/LSTM from scratch to classify video data as real or synthetic, achieving 83% validation accuracy ([link](#))

App Game Development: Independently programmed and released a game on the App Store for iPhone called Flux Ball (10,000+ downloads)
